

THE IMPRESSION OF VOLUNTEERING AT COLT

Hello! My name is HOEUNG SOMALIN. I'm a third year student of The National Institute of Social Affairs majoring in SOCIAL WORK. I have been volunteered at COLT since January 15th 2020 until now. In order to gain work experience of my skill, in particular know how to work properly and professionally as a social worker, through training guidance from experienced teachers at COLT.

However, after I started volunteering at COLT, I was warmly welcomed and the vast amount of knowledge that Mr. PISETH, Mr. RAHU and Mss. KRISTAIN taught me in relation to many of the work, including: working with the community directly (case management, follow up , observations, and how to make a plan intervention for families and children) , and also working with children directly by the way the teachers taught me how to observe children while they were learning from their different behaviors. And how we can know their need through counseling also, not only that, the teachers also taught me various administrative tasks.

Overall, all the knowledge that I have gained and are applying so far that the teachers have given me is really good and almost all the experiences that I wanted to know before.

Finally, I would like to say thanks you to all teachers who work at COLT as a whole for your warmly welcomed, kindly, friendly and pay attention to training instructions on me with all the physical and mental strength with the good work experience that has given me so far. By the way I will try my best to work hard and follow the teacher's instructions.

Thank you!
